

Radio Club Upcoming Events

- 7 April, 18:30, Foy Ballroom – Dr. Wentworth is giving the AU Final Lecture as part of Honors Week. The topic is “Electromagnetics and Life: A Strained Analogy”. There will be free pizza for the first one hundred attendees. More information can be found here: <http://wp.auburn.edu/sga/initatives/honors-week/>
- 9 April, 18:00, Broun 235 – Regularly scheduled AUARC meeting. We’ll be preparing for our guest lecture appearance and doing a trial run. We will be showing a short PowerPoint to the class, then doing demonstrations with the SDR and other fun “toys”. If you are interested in participating and weren’t at the April 2nd meeting, or if you have ideas for demos that can be done in the basement, far from good radio signal, let us know.
- 13 April, 14:00, Broun 125 – AUARC guest lecture in Dr. Wentworth’s Radio Lab class. This has been a good recruiting tool for us in past years.
- 16 April, 18:00, Broun 235 – John Klingelhoefter (WB4LNM) is presenting on AMSAT, amateur radio satellites, at the regularly scheduled AUARC meeting.
- 27-28 June – ARRL Field Day! Plans are still in the works, but it seems that enough of club members will be in town over the summer to make this a worthwhile event to participate in. More info on Field Day here: <http://www.arrl.org/field-day>
